Madison Sage

Software Developer

 Stckrz - Github   Madison Sage - Linkedin   Portfolio   rin449@gmail.com

Summary

Motivated and enthusiastic individual with a strong foundation in web development. Proficient in Javascript, the MERN stack, and SQL. seeking a software engineering position to utilize and further develop my skills.

Projects

Calledit!   Link to project

- Social media platform where users can make predictions, and other users can discuss the prediction and vote as to whether the prediction will come true.
- Utilized the MERN stack with Tailwind for a responsive design.
- Implemented a points system to further engage users, rewarding them for making correct predictions.

Inventory System   Link to project

- An inventory managemente system with functionality for fulfilling orders, restocking items, and adding/editing shop items.
- Utilizes the LAMP stack for the backend with VueJS for the frontend.
- Also created a separate front-end application for making orders to the inventory system.

Portfolio   Link to project

- My portfolio, showcasing some of my projects as well as my skills.
- Utilizes React with Tailwind for styling.
- Uses gsap for animations, creating a snappy, smooth experience.
